

Exfiltration 1	Spies 2	Fog of War 2
INTELLIGENCE • ASSET ACTION Bank Exfiltration as an Asset. After an opposing Gambit or Tactic is revealed in a battle involving you, before the battle result is determined, you may discard Exfiltration. If you do, withdraw. MISSION Complete after you withdraw from a battle after an opposing Tactic was revealed.	INTELLIGENCE ACTION Reveal the opponent's Hand. Draw one card, then discard one card. BATTLE Before Tactics normally reveal, reveal each opposing face-down Tactic. You may then revise your own Tactics or withdraw. If you chose to remove Spies as a Tactic, put it in your Graveyard. MISSION Complete after you reveal an opposing face-down battle card before its normal reveal, then win that battle.	INTELLIGENCE • TERRITORY OVERLAY ACTION Place Fog of War as an Overlay on a revealed Territory. Remove it after the next battle fought there. During that battle, the controller of this Territory sets their Gambit and chooses their Tactics after the opponent's corresponding choice, regardless of who initiated the battle. BATTLE After Tactics are revealed, if your opponent set a Gambit and has one or more Tactics in battle, they choose one: return their Gambit to their Hand; or return each of their Tactics to its source. They have no Gambit or no Tactics in this battle, as chosen. MISSION Complete after your opponent has both a Gambit and one or more Tactics in a battle involving you, then loses that battle.

Disinformation 2	Operational Reassessment 3	Intercepted Orders 3
INTELLIGENCE GAMBIT When Gambits are revealed, if the opponent also set a Gambit, gain advantage. During the Aftermath of the battle, return Disinformation to your Hand instead of putting it in your Graveyard. MISSION Complete after you win a battle in which the opponent set a Gambit and you did not.	INTELLIGENCE ACTION Return your Active Mission to your Hand, then place another eligible Intelligence card from your Hand face down as your Active Mission. It cannot complete this turn. BATTLE After Tactics are revealed, choose one: withdraw; or replace Operational Reassessment with an eligible Battle card from your Hand whose effect can still resolve. If you replace it, put Operational Reassessment in your Graveyard and place the replacement face up.	INTELLIGENCE ACTION Bank Intercepted Orders as an Asset. When an opponent forms their Reserve in a battle involving you, before they choose Tactics, you may discard Intercepted Orders. If you do, reveal that Reserve and choose one card. They cannot choose that card during this battle. BATTLE Before Tactics normally reveal, reveal each opposing face-down Tactic and the opponent's Reserve. Return one opposing Tactic of your choice to that Reserve. The opponent cannot choose that card again during this battle. They may choose one eligible replacement from the Reserve or pass.

Reconnaissance 3	Deep Cover 3	Assassins 4
INTELLIGENCE ACTION Bank Reconnaissance as an Asset. During opening effects in a battle you initiated, you may discard Reconnaissance to reveal the opponent's Hand. You may then withdraw or continue the attack. BATTLE After Tactics are revealed, you may withdraw. MISSION Complete after you win a battle you did not initiate while occupying an enemy-controlled Territory.	INTELLIGENCE ACTION Bank Deep Cover as an Asset. When your Active Mission would fail, you may put Deep Cover in your Graveyard. If you do, return that Mission to your Hand instead. BATTLE If an opposing effect revealed one of your Gambits or Tactics before its normal reveal, gain advantage.	INTELLIGENCE ACTION Reveal the opponent's Hand. Choose one card there and discard it. BATTLE When Assassins is revealed, negate one opposing Gambit. If Assassins is revealed with Gambits, resolve this before other Gambit effects. If the opponent set no Gambit, give them disadvantage during this battle. MISSION Complete after you reveal one or more cards in the opponent's Hand outside a battle, then win a battle against that opponent in which they set a Gambit.

Treason			4		
INTELLIGENCE • ASSET			INTELLIGENCE • ASSET		
ACTION Bank Treason as an Asset. After Tactics are revealed in a battle involving you, before an opposing Battle effect resolves, you may discard Treason. If you do, choose one unresolved opposing Battle effect. Negate it, then resolve that printed effect as though you controlled it.			ACTION Bank Subversion as an Asset. When an opposing banked Asset's effect would resolve, you may put Subversion in your Graveyard. If you do, negate that effect and put the opposing Asset in its owner's Discard Pile if it remains in play.		
BATTLE After Tactics are revealed, choose one unresolved opposing Battle effect. Negate it, then resolve that printed effect as though you controlled it.			BATTLE Opposing banked Assets cannot be activated and their effects cannot resolve during this battle.		
MISSIONS Complete after you win a battle in which an opposing banked Asset was activated or resolved and none of your banked Assets were activated or resolved.			MISSION Complete after you win a battle in which an opposing banked Asset was activated or resolved and none of your banked Assets were activated or resolved.

OPERATIONS REFERENCE			INTEL TRACKER		
GAMBIT SURVEILLANCE Once per battle after the opponent sets a face-down Gambit, spend 1 Intel to reveal it.			At 0, Intel has no maximum. Place beneath the Open Intel Reference and slide to the current printed value. Continue recording above 20 separately if necessary.		
TACTIC SURVEILLANCE Once per battle after the opponent chooses face-down Tactics, spend 1 Intel for each opposing Tactic revealed. The two Surveillance opportunities are independent.			_____INTEL		
INTERFERENCE Immediately after Surveillance, spend 2 additional Intel per revealed card removed. A Gambit returns to Hand; a Tactic returns to Reserve. Its owner may replace it from that source or pass.			_____INTEL		
DIRECT INTERFERENCE A face-up opposing choice may be Interfered with directly for 2 Intel at the same response timing without Surveillance.			_____INTEL		
REVISION & LIMITS After Interference and replacements, revise your corresponding choice if already made. A replacement creates no new reveal or response window. Prevented uses still spend Intel and use the opportunity.			_____INTEL
